

Software developer

ALLOcloud (www.allocloud.com) is a Cloud-based IP-Telephony and Unified Communication service.

Region: Saintes, Belgium (close to Brussels, near Halle)

Job description:

You will contribute to maintain and enrich our Cloud-based IP-Telephony solution and infrastructure-related set of tools.
Follow latest technologies, setup labs, benchmark, evaluate & implement.
Integrations of our platform with existing tools, focusing on creating the best customer-experience possible.

Required expertise:

You have a good experience in development, preferably with Python and/or Javascript.
You love working on distributed redundant architectures and services load-balancing.
You have experience with SQL, ideally on PostgreSQL.
You are familiar with Linux environments.
You have a good knowledge of web technologies, especially in creating or connecting to APIs and on Simple Page Applications.
The Open-source world and its usual tools are very familiar to you.

Additional assets:

Your contributions in OpenSource is a plus (Github...)
You have some experience with the asynchronous pattern.
Experience with SQL architectures.
Knowledge of JSONB in PostgreSQL.
Experience with Ansible.
Experience with VoIP (Asterisk or other).

Candidate profile:

Curious about technology, you love trying new things while staying very pragmatic in your technological choices, aiming at stable and business-oriented solutions. You have excellent communication skills. You love learning from your colleagues as much as sharing your own views with them and creating the necessary documentation.
