

# INTERNSHIP PROGRAM

## SOFTWARE DEVELOPER

### Responsibilities

As an Intern software developer, you will contribute to enrich and maintain our Cloud-based IP-Telephony solution and infrastructure-related set of tools. You will use the latest technologies, setup labs, perform benchmarks, evaluate alternatives and develop code.

### Profile

- You are in your last year of Bachelor or studying towards a Master's degree
- Your field of study is computer sciences
- You are curious about technology
- You have strong analytical skills
- You are a problem solver and have an innovative mindset
- Dutch or French speaking and fluent in English
- Familiar with Python or Javascript

### The ALLOcloud Internship experience

- Being part of an Open Source-minded team, you will be able to contribute by yourself to the Open Source projects that we support
- We use the Agile methodology (XP+SCRUM+Kanban), which brings important benefits to both the development team and our customers
- Working on real time communications with stringent performance constraints gives a very interesting angle to software development
- We drive Interns to have a full stack approach to development, which gives Interns the possibility to experience many parts of programming

Here's what you can expect to learn in a **full stack developer's** skillset:

Backend: Debian Linux, Python 3, AsyncIO, PostgreSQL 10+pglogical, HAProxy, Nginx, Asterisk, Kamailio, aiosip

Frontend: ES8, React, React-native, WebRTC

# INTERNSHIP PROGRAM

## Kickstart your career. Grow your skills. Make an impact. Let's get stuff done!

Whether you care deeply about telecoms, software development, marketing, sales, or finance, the opportunity to understand business is in your hands. Within weeks of starting an Internship at ALLOcloud, you'll make changes that impact tens of thousands of users. We treat people like adults, and Interns like permanent employees. You'll work on real projects, solve real problems, and gain feedback along the way. We provide the tools you need and trust you to take ownership and make the right decisions.

### Frequently Asked Questions

Who can apply?

*Internships are open to anyone who freshly graduated or is looking for an Internship as part of her/his studies.*

How do I apply?

*When you find an Internship that gets you fired up, read the posting fully, note all requirements, and apply online through our [contact form](#).*

Are they all tech Internships?

*Nope! We hire Interns for sales, marketing, and finance positions, to name a few. Our Internship opportunities vary depending on business needs.*

What kind of projects are given to Interns?

*We treat Interns like full-time staff. You'll work on real projects, with dedicated mentors, and have a real impact on the work, our platform, and our culture.*

What do we look for in an applicant?

*Passion, curiosity, and authenticity. We love working with people who are passionate about their work and the problems they solve. We look for constant learners, who ask a lot of questions, and learn beyond what's expected.*
