

UNIFIED COMMUNICATIONS

All your communication needs in one place.

What is Unified Communications?

UCaaS (Unified Communication as a Service) is a solution that combines corporate telephony, virtual meetings, instant messaging (business chat) and contact center into a single cloud-based platform.

Happy customers

Stay in touch with customers quickly and simply. Phone or chat on any device. Resolve issues and build loyalty.

Great workdays

Bring colleagues closer with one platform - for all your business communication.

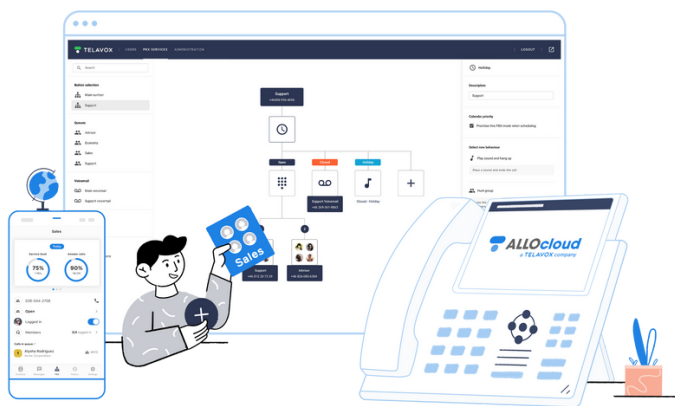

One hub

One admin portal for statistics and cost control.
One app for users to collaborate and manage communication features.

Digital transformation

A streamlined and optimized platform for greater productivity and happier customers.

Optimized communication

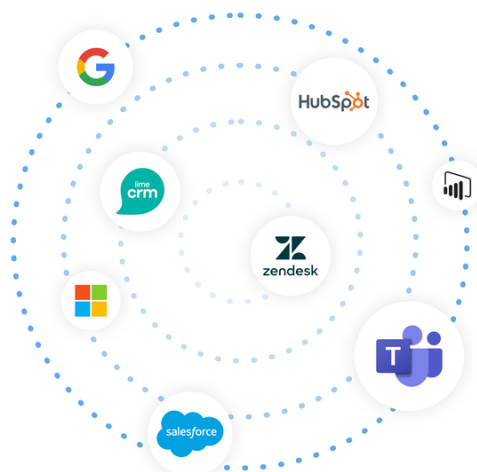

In only few clicks, Administrators can manage Users, telephony, call flows, statistics etc. in one easy-to-use interface.

In addition to their IP phone, Users can download the apps (Web, Windows, Mac, Android, iOS) on all their devices (PC, Smartphone or Tablet) to collaborate and manage their communication intuitively. Working remotely at home, or on the go becomes seamless. Calls can be recorded, put on hold, transferred ; PBX can be set up in minutes with call routing, IVR, Users, voicemail and messaging ; Chat and documents can be send - all from a single platform.

All channels (voice, video, chat, etc.). On all your devices. Wherever you are.

Advanced integrations

Our service is easy to integrate with your favorite business applications, such as Microsoft Teams, CRM systems and Power Bi. Our integrations give access to our service from within your applications. Save time without switching back and forth between applications.

Discover Unified Communications live
